

Anthony **STALIN**

Toulouse - FRANCE | +33 681945573 | anthony.stalin@hotmail.com | <https://anthony-stalin.com>
Willing to relocate to the US, Canada or Europe

Objective

I am a **French** full-stack developer with **3 years of experience**, focused on building efficient, responsive web applications. I am also fully hands-on in DevOps: I design and operate CI/CD pipelines, automate with Ansible, and ship with Docker/Kubernetes and Jenkins.
Eager to contribute to innovative teams and open to opportunities in the US or Canada.

Work Experience

DevOps Engineer	Airbus – 5A Solutions	2025
	Toulouse – FRANCE	

- Contributed to development and DevOps activities on VPM projects.
- Created and maintained Ansible playbooks to automate routine tasks.
- Set up Continuous Integration and Continuous Deployment (CI/CD) with Jenkins.
- Developed and improved features in C++.
- Collaborated with cross-functional teams to optimize CI/CD pipelines

Development Engineer	Naval Group - Alten	2023 – 2024
	Lorient - FRANCE	

- Conducted compliance checks on virtual machines, ensuring they were updated for security purposes.
- Created and verified virtual machines to meet client specifications.
- Utilized programming languages such as Python and Bash to automate and manage tasks.

Development Engineer	Thales - Alten	2022 – 2023
	Cholet - FRANCE	

- Worked as an Integration, Verification, and Validation (IVV) tester and Java developer.
- Conducted IVV test campaigns to ensure the proper functioning of C++ code on test benches.
- Developed unit tests in Java to validate software components.
- Created a Python script to automate testing processes and improve efficiency.

Web Developer	Melting K	Apr – Sept 2021
	Toulouse - FRANCE	

- Worked as a frontend developer at Melting K, a global communication agency.
- Improved a CMS developed in PHP to enhance speed and responsiveness.
- Conducted a technology evaluation between VueJS and ReactJS
- Implemented VueJS on the CMS to achieve the desired improvements.

Full Stack Developer	France Automatismes	2019 – 2020
	Toulouse - FRANCE	

- Developed a configurator to help clients customize their future products using PHP Symfony, MySQL, HTML/CSS, JavaScript, and Bootstrap.
- Conducted competitive analysis and proactively recommended new technologies and enhancements for user experience.
- Improved user experience and attracted more potential clients.
